ITHEA IBS ISC No.: 22

First edition

Recommended for publication by The Scientific Council of the Institute of Information Theories and Applications FOI ITHEA

This issue contains a collection of papers that concern the information modeling and its methodological and technological problems. Main scientific areas which are concerned are: data mining; pattern recognition; decision support systems; robotics; data and knowledge bases; disaster risk assessment, based on heterogeneous information (from satellites and in-situ data, and modeling data); virtual reality in educational systems; telecommunications; open social info-educational platforms; system analysis and synthesis.

It is represented that book articles will be interesting for experts in the field of information technologies as well as for practical users.

General Sponsor: Consortium FOI Bulgaria (www.foibg.com).
